Dear S.M Rammala

RE: PROPOSED TOWNSHIP: HARTLAND ECO ESTATE: TELKOM PLANT NOT AFFECTED

Your letter and accompanying drawings dated 02 April 2008 in the above regard, refers.

Telkom has taken note of the proposed establishment of the **HARTLAND ECO ESTATE** and would like to point out that in the event that construction at the development site necessitates the deviation or removal of Telkom's telecommunication facilities,

- the township developer should request Telkom in good time for the deviation or removal of the Telkom telecommunication facilities.
- the cost for such deviation or removal shall be for the account of the township developers.

In the event that the township developers decide to install underground pipes for telecommunication service purposes for practical and aesthetic purposes, the costs for such conduit-pipes will be for the township developer's account. Alternatively, Telkom in its sole discretion will determine the most suitable and cost effective means to provide the telecommunication facilities at the proposed township.

Should the township development project be approved, the township developer should without delay, inform the Telkom Access Network Engineering Department officer **Moses Hlakudi** at telephone number 012-311-4337 for Telkom to proceed with the detail telecommunication infrastructure planning.

Please note that Telkom will only commence with the provision of telecommunication facilities (cabling) once Telkom has determined the demand for telecommunication services at the development and the project has been proved to be viable.

In the case of any further enquiries, please contact **Moses Hlakudi** at telephone number 012 311 4337 or 082 788 0853. Toll free number is 0800203951 in case of damaging Telkom structure.

All Telkom SA LTD rights remain reserved.

Yours faithfully
